I'm a self-taught developer and have been writing code for 5+ years now. During that time, I've built everything from websites, automation scripts, and discord bots to APIs, desktop and mobile apps, and more.

Professional Experience

HassanDev, Lead Developer [↗](#)

01/2020 – present | Remote

- Accumulated several years of experience, offering a range of services related to web development, design, scripting, scraping, or any other relevant skills, demonstrating versatility and adaptability in delivering client projects.
- Developed strong entrepreneurial skills by managing client relationships, setting project timelines, pricing services competitively, and building a solid online presence.

Skills

Languages: Python, Rust, Javascript, TypeScript, Bash, HTML5, CSS3, Sass, and more

Frameworks and Technologies: Git, Github, Docker, React, Redux, NextJS, Django, Prisma, JWTs, OAuth, Websockets, RabbitMQ, discord.py, and more

Databases: PostgreSQL, MySQL, MongoDB, Redis, and more

Deployment: Linux, Apache, Nginx, AWS, Heroku, Vercel, Linode, cPanel, and more

Projects

Roami, pinterest-like web app [↗](#)

- Pinterest-like image sharing web app, deployed on Vercel.
- Demonstrated full-stack proficiency, developing platform with React and Django.
- Implemented responsive design to ensure Roami is accessible on all devices.
- Integrated various Google APIs, such as Google signin to allow seamless user registration and login.

Lessons With A Native, language learning web app

- Provides an interactive platform for creating, organizing, and delivering language lessons.
- Incorporated the Nord theme to enhance the app's visual aesthetics.
- Built a robust module that tracks student progress on each test for educators to monitor.
- Built with Django and deployed on Vercel.

PCF Labs, custom e-commerce website [↗](#)

- Custom e-commerce site that integrates with Stripe to facilitate transactions.
- Beautiful, responsive design that gives a pleasant experience on all devices.
